Programmable EFI

LED: A B C D

POT: 1 2 3

Fuel addition

D

C

B

0   RPM
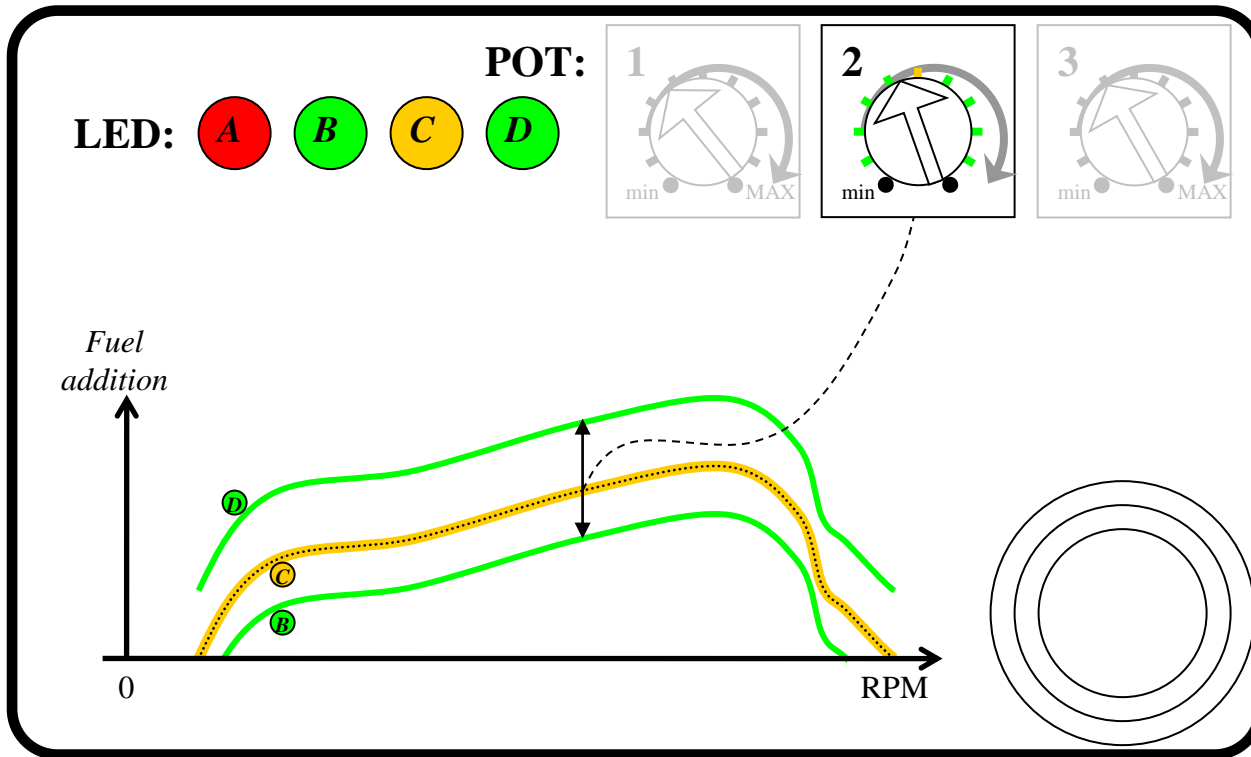

LEDs meaning:

- *LED A blinks fast:*
  The unit is initialising

- *LED A & C lights up:*
  The box is adding fuel according to the programmed curve.

- *LED B lights up:*
  The box is adding **LESS** fuel than the programmed curve.

- *LED D lights up:*
  The box is adding **MORE** fuel than the programmed curve.

POTs purpose:

- **POT 1 & 3 have no function on the digital type** change the fuel addition with EFI-Soft.

- **Turn POT 2 to** increase or decrease the fuel addition

  LED C on -> programmed curve

  *LED B on -> **LESS** than programmed curve*

  *LED D on -> **MORE** than programmed curve*

Turning POT 2 clockwise adds more fuel
